elliferous.

Senecio = the Goldenrods

Liquidambar styraciflua. Sweet  
Gum.

Erigeron = Daisy -

Axalis = Sheep sorrel -

Coccoloba = the Gourd tree  
taken at Tacotalpan.

Tabernaemontana nelsoni, Rose-  
Shrub 12-18 ft dry hillsides  
near Tuxtla = double fruited  
milk-jucied plant.

Nymphaea ampla. Water lily of  
Lake Catmanaco

Erythrina. The red bean trees.

Platanus sycamor.

Taraxacum - Dandelion

Spina discolor - Small leaved  
shrub 6-10ft. with straggling heads of  
small white flowers 9000-10000 ft. on  
San Felipe -

Spondias lutea - "Cisnelá"  
The yellow plum-like fruit  
of hot country.

Stevia a genus of  
Composite plants with fine slender  
flower heads. 4 spines on the seed -

Dictyanthus Fish-net  
flowers (vine).

Salvia = The Sages - all  
have 2 stamens.

Delphinium = Larkspur.

Dalea = a genus of small flowered  
blue, purple & red leguminous flowers.

Acacia cochliacantha.  
Inflated thorn acacia —

Festuca livida ! Highest grass  
on Mt. Orizaba

Hectia Agave-like  
plant abundant on road to Cuicatlan.

Agave megalacantha 3. The Agave  
from val. of Oax. to Cuicatlan with short  
stout leaves thus  - How Rose  
look up my spec's of this.

Bursera is the genus to which  
the Copal trees belong (including  
palo mulato)

Hymenocallis is the genus of  
lily-like white flowers with long  
filaments which grow in damp  
places.

Tabebuia <sup>donaldsmithii, Rose.</sup> = white Mahogany  
or Primavera tree.

Jatropha montana = The milky  
juiced plants with double fruit

Randia = The thorny shrubs  
with white flowers ~~the~~ gourd  
like fruit on end of spiny branches
